

Giles County

CAREER & TECHNICAL EDUCATION

Year In Review

2020-21

Director

This past school year had many challenges. I am very proud of our CTE staff for creating a positive, welcoming, and safe environment for our students. Through the teacher's creativity, we were able to continue on with many skills based learning activities for our students. We are certain, with the partnerships that we have built over the years between staff, students, parents, and community and business leaders, that we will continue to cultivate a culture of student success for the students of Giles County.

Through the programs at Giles High School, Narrows High School, and the Giles County Technology Center, we strive to provide students with modern facilities that incorporate innovative equipment and technology to prepare our students for college and career readiness. As we continue to stay current with modern technology and equipment we were able to add a new plasma cutting table in our welding program as well as a simulation manikin that offers advanced patient care scenarios for our nursing programs this year. Students have the opportunity to gain industry certifications and earn college credit through dual enrollment with New River Community College with many of our programs. All program areas offer the opportunity for a student to earn either an industry certification or state license upon completion of the program. In addition, students may become involved in skills and leadership activities through the student organizations such as FBLA, FCCLA, FFA, SkillsUSA and HOSA. Each year students can earn honors at district, state and national levels with these organizations. Our goal is to give each student a well-rounded education that includes classroom and lab instruction with a focus on hands-on learning, character building, and workplace readiness skills that will stay with the students for many years to come.

It is an exciting time for CTE in Giles County with many opportunities for our students' success and community outreach projects. The programs will continue to focus on up-to-date technical training in cooperation with business and industry to provide our students the best possible preparation for college and career readiness.

Our Mission

The mission of the Giles County Technology Center is to cooperatively work with business, industry, and the community to prepare individuals to enter a career, to further their education, and to acquire the personal skills and strong work ethic to succeed in the 21st century.

Giles County Public Schools does not discriminate on the basis of race, color, national origin, sex, disability of age in it's programs, activities, and provides equal access to the Boy Scvouts and other designated youth programs. The below person(s) have been designated to handle inquiries regarding the non-discrimination policies.
